WARRANTY

MESSAGE FROM THE PRESIDENT

With spring comes renewal. And this spring, you'll find that Taurus has renewed its commitment to quality, innovation and customer support unlike ever before. In addition to celebrating our 80th year of manufacturing quality firearms, we're also putting the finishing touches on the construction of our all-new 200,000-square-foot manufacturing facility and corporate headquarters in Bainbridge, Georgia.

Moreover, we recently announced the implementation of our new Taurus Limited Lifetime Warranty. Original purchasers of a Taurus firearm covered by a one-year warranty will now be covered under this new Limited Lifetime Warranty. All legacy firearms covered under the original lifetime warranty will remain covered by that warranty.

Why introduce a Limited Lifetime Warranty now? The answer is quite simple: Taurus customers have spoken—and we listened. In developing this new policy, we incorporated feedback received from dedicated Taurus handgun owners and enthusiasts based on what they wanted to see in a handgun warranty.

Customer satisfaction is the ultimate objective in the Taurus mission to provide safe and reliable firearms for personal defense, competition or recreational shooting. My hope is that you will find our new Limited Lifetime Warranty not only backs that mission—but ensures confidence in all Taurus customers that we will always stand behind our products and our consumers.

American Rifleman is the on-screen version of the National Rifle Association's American Rifleman magazine, "the world's oldest and largest firearm authority." American Rifleman is the pre-eminent source for accurate, compelling, authoritative information on all aspects of firearms and the shooting sports.

Airing on the Sportsman Channel, Handguns & Defensive Weapons combines the most popular features of two of the channel's most well-known shooting shows, Handguns and Personal Defense. It is co-hosted by Rich Nance and James Tarr and covers everything from competition and self defense to pocket guns and long distance rifles.

Everything Eichler is a closer look at the Eichler Field to Table lifestyle. They will share a combination of the daily challenges of ranching, farming and running an outfitting business in Colorado. This show will still include all of the extreme bowhunting and predator hunting action viewers love but will also include hunts with friends, family and clients.

Gallery of Guns TV brings the home shopping concept, but in this case for firearms, to the viewers. This one-of-a-kind show is designed to educate consumers on the unique features and benefits of select firearms from Davidson's GalleryofGuns.com.

With more than five million members, the National Rifle Association is America's longest-standing civil rights organization. While widely recognized today as a major political force and as America's foremost defender of Second Amendment rights, the NRA has, since its inception, been the premier firearms education organization in the world.

HAVA was conceived and organized in 2007 by a Committee of shooting sports industry executives to help the healing and re-integration of disabled veterans and injured active military. The ultimate goal is to increase their confidence and hope for the future by reconnecting with their love of the outdoors and the American traditions of hunting and firearms.

WARNING concerning ammunition marked "+P" and "+P+". Taurus Firearms rated for "+P" ammunition are rated for Sporting Arms and Ammunition Manufacturers Institute (SAAMI) compliant "+P" ammunition. SAAMI does not recognize any "+P+" ammunition at all. It is DANGEROUS to fire "+P+" ammunition in any Taurus firearm and if you do so you may be seriously injured or killed.

In addition, it seems some ammunition marked "+P" is not SAAMI compliant either. There are only four calibers that can carry a "+P" rating from SAAMI. They are 38 Special +P, 9mm Luger +P, 38 Super Automatic and 45 Automatic +P. There are no other SAAMI approved "+P" loads. Any ammunition in any other caliber marked "+P" is not SAAMI compliant, may be dangerous and should not be used.

DANGER FOR "+P+"
Never use "Plus -P -Plus" (+P+) rated ammunition in any Taurus firearm. The Sporting Arms and Ammunition Manufacturers Institute (SAAMI) does not recognize such ratings and such ammunition can be very dangerous. Firing such ammunition can cause catastrophic failure in firearms resulting in serious bodily injury or death.
